SUMMARY

Business Analyst with 3+ years of experience conducting Agile requirements elicitation, BPMN process modeling for As-Is/To-Be workflows, and SQL data analysis. Expertise in BRD/FRD/RTM documentation, UAT planning with Jira, Tableau and Power BI dashboards, and HIPAA compliance support delivering stakeholder-aligned solutions with regulatory traceability.

SKILLS

Methodologies & Frameworks: SDLC, Agile (Scrum, Kanban), Waterfall, UML Modeling

Programming Languages: Python, SQL

Database Management and Data Analysis: MySQL, SQL Server Reporting Services (SSRS)

Business Analysis: Requirements Gathering, FRD/BRD Documentation, UAT Testing, User Stories, Process Modeling, Stakeholder Management, Use Case Development, Risk Assessment & Mitigation, Change Management, Quality Assurance, Business Process Analysis, Test Planning

Stakeholder Management: Cross-Functional Collaboration, Training Programs, End-User Support, Stakeholder Communication

Data Visualization Tools: Tableau, Power BI

Project Management: Jira, Confluence, MS Visio, Lucidchart, MS Office (Excel, PowerPoint Outlook), Salesforce

Analytical Techniques: Cost-benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis, Root Cause Analysis, Budget Analysis, Financial Modeling, Customer Relationship Management (CRM) Analysis

Cloud Platforms: AWS, Azure

Soft Skills: Critical Thinking, Problem Solving, Attention to Detail, Strategic Planning, Analytical thinking, Adaptability

EDUCATION

Master of Science in Data Science | Florida Atlantic University, Florida

May 2025

Bachelor of Technology | CMR Institute of Technology, India

May 2022

PROFESSIONAL EXPERIENCE

Business Analyst | Humana, Florida

January 2025 - Current

- Analyzed healthcare claims data using **SQL** and **MySQL**, defined **data validation rules**, and conducted **root cause analysis** workshops, contributing to automation initiatives estimated to deliver \$200,000 in annual processing cost savings.
- Led **Agile requirements elicitation** sessions with product owners and compliance teams, documenting 50+ **user stories**, **acceptance criteria**, and **functional requirements** supporting Medicare plan comparison enhancements contributing to 15% enrollment conversion.
- Defined **As-Is** and **To-Be** process flows using **BPMN** and **Visio**, translating business needs into **system integration requirements** for EHR workflows while supporting **HIPAA compliance** and alignment with approved \$180,000 implementation budgets.
- Developed **Tableau dashboards** performing **gap analysis** and **cost-benefit analysis** on operational KPIs, enabling leadership decisions that reduced claims rework, improved turnaround times, and supported recurring reductions in annual operational expenses.
- Owned **UAT planning and execution** by creating test scenarios, coordinating business users, tracking defects in **Jira**, and resolving **80%** of issues pre-release, significantly reducing downstream production rework risks.
- Maintained comprehensive **BRD**, **FRD**, and **RTM** documentation for 150+ requirements, ensuring traceability across **business rules**, **system changes**, and **regulatory needs** while reducing healthcare claim rejection rates by 18%.

Business Analyst | Citus Infotech, India

January 2021 – July 2023

- Facilitated stakeholder workshops to gather **functional** and **non-functional requirements** for CRM lead scoring enhancements, defining **business rules**, prioritization logic, and **acceptance criteria** that increased sales team productivity by 25%.
- Authored detailed **user stories**, **wireframes**, and **functional specifications** in **Confluence** and **Visio**, enabling development teams to deliver sales analytics dashboards supporting accurate identification of high-value prospects.
- Performed **As-Is** and **To-Be** process mapping using **BPMN** and **Excel** data analysis for ecommerce checkout optimization initiatives, simplifying workflows and reducing cart abandonment through a redesigned three-step transaction process.
- Defined **data mapping**, **validation rules**, and **system integration requirements**, executing **UAT** with **SQL Server queries** to ensure regulatory compliance and functional accuracy for guest checkout and payment processing features.
- Led **change management** activities including **impact analysis**, training documentation, and stakeholder communications, driving 85% user adoption across departments during phased system rollout transitions.
- Delivered **Power BI dashboards** and **root cause analysis** for inventory management improvements, identifying automation opportunities that reduced manual processing time and improved data accuracy across operational reporting workflows.

PROJECTS

CareFlow360: Optimizing Healthcare Claims Through Process Intelligence and BI Automation:

- Led process optimization of 50K+ healthcare claims using SQL and BPMN modeling, reducing claim processing time by 23% and rejection rates by 18%.
- Developed interactive PowerBI dashboards to track claim statuses and operational KPIs, enabling proactive decision-making and saving \$200K annually in admin costs.
- Collaborated cross-functionally on EHR integration and HIPAA-compliant automation, driving a 15% increase in patient enrollment and resolving 90% of UAT defects pre-launch.
