

Patrick Curiale

Senior Data Analyst

patrickcuriale@gmail.com | (856) 404-3667 | Philadelphia, PA 19107

Professional Summary

Senior Data Analyst with 7+ years of experience driving business decisions through data automation, scalable BI platforms, and advanced analytics. Expert in SQL, Python, and modern BI tools to improve data accuracy, reduce manual reporting, and deliver executive-ready insights. Strong cross-functional partner supporting product, marketing, finance, and operations, with experience enhancing forecasting models to improve planning and strategic outcomes.

Work History

Nutrafol
Data Analyst

04/2024 – Present
Remote

- Designed and maintained automated Tableau dashboards, reducing manual reporting effort by ~35% and improving turnaround time for leadership and operational teams.
- Built SQL- and Python-driven data pipelines to analyze large customer and performance datasets, uncovering trends impacting retention, acquisition, and revenue.
- Partnered with senior leadership to enhance forecasting models, improving forecast accuracy by ~15% and supporting annual planning and budget decisions.
- Delivered high-impact ad hoc analyses for marketing, operations, and finance to support time-sensitive strategic initiatives.
- Implemented data validation and quality checks, reducing reporting errors and increasing stakeholder confidence in analytics outputs.

Best Egg
Insights Analyst

03/2021 – 03/2024
Wilmington, DE

- Integrated customer survey data into Snowflake and NLP platforms, enabling sentiment analysis across 100K+ customer responses.
- Designed and maintained Power BI dashboards providing real-time visibility into product performance, customer behavior, and operational metrics.
- Led customer journey and behavioral analyses presented company-wide, influencing cross-functional prioritization and strategy.
- Developed Python automation scripts to streamline recurring data processing and reporting, saving approximately 8–10 hours per week.
- Partnered with product, marketing, and operations teams to deliver insights that improved customer experience and operational efficiency.

Thomas Scientific
Data Analyst

11/2018 – 03/2021
Swedesboro, NJ

- Developed SQL stored procedures and reporting solutions supporting warehouse and branch-level performance across multiple locations.
- Rebuilt legacy reports using Python-based visualizations, improving clarity, usability, and adoption by business users.
- Led data cleansing and normalization efforts during multiple company integrations, ensuring accurate SKU alignment post-merger.
- Collaborated with stakeholders to define reporting requirements and deliver reliable operational and performance insights.
