

SIVA DURGA PRASAD PUTTA

Deltona, FL, USA | (316) 751-8028 | sivaputta092@gmail.com

Summary

Industrial Engineer and Supply Chain professional with expertise in end-to-end supply chain optimization, ERP implementation (NetSuite, SAP S/4HANA), and data-driven decision-making. Proficient in Python, SQL, Power BI, and advanced Excel for automating reporting, building predictive models, and developing KPI dashboards. Proven ability to lead teams, manage complex migrations, negotiate cost-saving contracts, and improve operational efficiency across procurement, logistics, and inventory management. Skilled in project management, root cause analysis, and stakeholder collaboration to enhance system performance, reduce costs, and exceed service-level targets. **Skills**

- ❑

Software & Technical Skills: Python, SQL, SAP (S/4HANA, MM, PP), NetSuite ERP, Power BI, MS Excel (Advanced Formulas, VBA, XLOOKUP), Amazon Web Services (AWS), Cloud Computing, Amazon DynamoDB, Data Visualization, Jira, Microsoft Office Suite, MS SQL Server, MS Access, MS Project, ERP Implementation & Integration, IDoc Interfaces, Barcode Systems, Process Automation
- ❑

Supply Chain & Operations Management: End-to-End Supply Chain Optimization, Inventory Management, Demand Forecasting, Procurement, Logistics & Distribution, Warehouse Operations, 3PL Management, International Shipping & Compliance, Letter of Credit (LC) Processing, Customs Documentation, Carrier Negotiation, Route Optimization, KPI Development & Monitoring, SLA Management, Order Fulfillment, Backlog Management
- ❑

Program, Project & Process Management: Project Planning & Execution, Stakeholder Management, Change Management, Budget Management, Risk Management, Cross-Functional Team Leadership, Process Improvement, Workflow Standardization, Root Cause Analysis, Data-Driven Decision Making, Digital Transformation, ERP Migration, System Configuration & Testing, User Training & Adoption
- ❑

Business, Strategy & Analytics: Data Analysis, Predictive Modeling, Cost-Benefit Analysis, Strategic Sourcing, Contract Negotiation, Cost Reduction, Financial Reporting, Audit Support, Voice of the Customer (VoC), Customer Relationship Management (CRM), Supplier Relationship Management, Go-To-Market Strategy, Competitive Analysis, Business Requirements Gathering, Functional Specifications

Certifications

Supply Chain Logistics

Rutgers, The State University of New Jersey (via Coursera)

June2023

Experience

- Primus Sterilizers (Chalmers Group Inc.) Supply Chain Analyst (Team Lead) | Sanford, FL | 07/2025 – Present

- Led the ERP migration from Macola to NetSuite, designing and executing data validation protocols, to restore system integrity and ensure zero disruption in order processing, for the finance and operations teams.
 - Automated inventory reconciliation using Excel VBA and XLOOKUP, to clear a backlog of 500+ unshipped orders within two months, for improving customer on-time delivery to 99%.
 - Implemented a barcode-based rack labeling system in the warehouse, to reduce picking errors by 40% and improve operational efficiency, for the logistics and fulfillment teams.
 - Developed and monitored KPI dashboards in Power BI tracking fill rate, on-time delivery, and invoice accuracy, to identify service gaps and drive a 15% improvement in overall supply chain performance, for senior management.
 - Negotiated contracts with 3PL providers and optimized outbound logistics, to achieve a 12% reduction in annual shipping costs, for the procurement and finance departments.
 - Processed international Letter of Credit (LC) shipments and managed customs documentation, to ensure 100% compliance and ontime delivery to 30+ countries, for global clients and trade compliance.
 - Mentored and led a team of 5 in daily supply chain operations, to implement standardized workflows and reduce order processing time by 25%, for enhancing team productivity and scalability.
 - Conducted root cause analysis on delivery failures using SQL queries on NetSuite data, to develop corrective actions that reduced shipment discrepancies by 20%, for the quality assurance and customer service teams.
- Sismos Solutions Inc SAP Consultant | Leawood, KS | 01/2025 – 07/2025

- Collaborated with business users to gather and translate requirements into functional specifications, to configure SAP MM (Materials Management) modules, for aligning system capabilities with procurement and inventory needs.
 - Designed and executed test cases for SAP S/4HANA implementation, to validate system functionality and ensure 100% accuracy in month-end financial closing, for the accounting and audit teams.
 - Developed SQL-based reports to analyze non-production material spending, to identify cost-saving opportunities that reduced indirect procurement costs by 18%, for the finance and operations stakeholders.

- Created user training materials and conducted workshops on SAP procurement workflows, to increase user adoption by 95% and reduce help desk tickets by 30%, for the client's internal teams.
- Assisted in the remediation of audit findings by streamlining accounts payable processes in SAP, to improve compliance and reduce processing time by 22%, for the internal controls department.
- Integrated SAP with external logistics platforms using IDoc interfaces, to automate purchase order transmissions and improve data accuracy by 35%, for the supply chain and IT teams.
- Supported the implementation of SAP Best Practices for inventory management, to optimize stock levels and decrease excess inventory by \$200K annually, for warehouse and financial planning.
- Analyzed voice of customer (VoC) feedback through SAP CRM data, to recommend process improvements that enhanced customer satisfaction scores by 15%, for the sales and service departments.

Ericom Software Systems PVT LTD – Client: Flipkart Supply Chain Specialist | Hyderabad, India | 06/2020 – 05/2023

- Built real-time Power BI dashboards tracking supplier KPIs and inventory turnover, to provide stakeholders with actionable insights that improved supplier performance ratings by 25%, for the procurement and vendor management teams.
- Automated weekly supply chain reports using Python scripts, to reduce manual reporting effort by 20 hours per week and improve data accuracy by 99%, for the logistics and analytics departments.
- Optimized transportation routes and carrier selection using data modeling, to reduce logistics costs by 15% and improve delivery times by 20%, for the e-commerce fulfillment centers.
- Deployed an automated inventory tracking system integrated with the client's ERP, to reduce stockouts by 30% and lower excess inventory by 25%, for improving order fulfillment rates and working capital.
- Negotiated contracts with 10+ logistics providers using cost-benefit analysis, to secure better rates and improve service level agreements (SLAs) by 18%, for the strategic sourcing team.
- Led a cross-functional project to redesign the supply chain network, to enhance warehouse throughput by 22% and reduce operational costs by \$150K annually, for regional operations managers.
- Developed demand forecasting models in Python using historical sales data, to improve forecast accuracy by 30% and optimize inventory planning, for the merchandising and planning teams.
- Implemented a dynamic routing system for last-mile delivery, to increase on-time deliveries to 98% and improve customer satisfaction scores by 20%, for the customer experience team.

Ericom Software Systems PVT LTD Supply Chain Analyst | Hyderabad, India | 11/2018 – 05/2020

- Created interactive dashboards in Power BI for procurement and logistics metrics, to enable real-time decision-making and improve reporting efficiency by 40%, for supply chain managers.
- Wrote complex SQL queries to extract and analyze data from relational databases, to identify procurement inefficiencies and achieve cost savings of 15% on annual spending, for the finance department.
- Assisted in implementing an inventory management system using SAP, to optimize stock levels and reduce excess inventory by 30%, for the warehouse and inventory control teams.
- Analyzed carrier performance data using Python, to recommend routing improvements that reduced transit times by 18%, for the logistics and distribution teams.
- Developed KPIs for supply chain efficiency monitoring, to provide stakeholders with monthly performance reports that drove a 12% improvement in on-time in-full (OTIF) delivery, for senior leadership.
- Supported supplier relationship management through contract analysis and negotiation, to improve reliability scores by 20% and ensure consistent material quality, for the production and quality teams.
- Collaborated with IT to integrate AWS cloud storage with existing reporting tools, to enhance data accessibility and reduce report generation time by 25%, for the analytics and business intelligence teams.
- Conducted root cause analysis on shipment delays using SQL and Excel, to implement corrective actions that reduced delivery failures by 15%, for the customer service and logistics departments.

Education

Master of Science – Science and Supply Chain Management Wichita State University	2025
Bachelor of Technology – Electronics and Computer Engineering KL University, Guntur	2018
