PROFESSIONAL SUMMARY:

- Over 4+ years of combined experience as a Data Analyst and Data Engineer across multiple industries.
- Strong background in designing and maintaining end-to-end data pipelines for structured and unstructured data.
- Expert in SQL for querying, data wrangling, and performance tuning.
- Proficient in Python for scripting, automation, and data processing tasks.
- Hands-on experience with cloud platforms including AWS (S3, Redshift, Glue) and GCP (BigQuery, Cloud Storage, Dataflow).
- Skilled in developing ETL/ELT workflows using tools such as Apache Airflow, AWS Glue, and Cloud Composer.
- Experience in data modeling, schema design, and implementation for both OLTP and OLAP systems.
- Solid understanding of data warehouse architecture and building scalable data lakes.
- Proficient in using tools like Tableau and Power BI for reporting and visualization.
- Strong focus on data quality, data validation, and maintaining data integrity.
- Worked on real-time data processing and streaming using Kafka and Pub/Sub.
- Familiar with version control, CI/CD pipelines, and infrastructure as code using Git and Terraform
- Experience with API integration and handling large data sets from multiple sources.
- Knowledge of data governance, compliance, and cloud security best practices.
- Effective communicator with experience working in agile, cross-functional teams to deliver data solutions.

TECHNICAL SKILLS:

Programming Languages	Python, PySpark,/SQL,
Python Libraries/Packages	NumPy, SciPy, Boto, Pickle, PySide, PyTables, Data Frames, Pandas, Matplotlib, SQLAlchemy, HTTPLib2, Urllib2, Beautiful Soup, PyQuery
Cloud Services	Amazon Web Services (AWS), Google Cloud Platform (GCP)
Bigdata/Hadoop Technologies	MapReduce,, SparkSQL,, AWS, Spark Streaming, Kafka, PySpark, Pig, Hive, HBase, Flume, Apache Flink,Yarn, Oozie, Zookeeper, Hue, Ambari Server,, EMR
Microservices	Spring Boot, REST APIs, gRPC
MachineLearning Algorithms	K-Nearest Neighbors, Logistic Regression, Linear regression, Naïve Bayes, Support Vector Machines, Decision Trees, Random Forests, Gradient Boosted Decision Trees. Neural network, CNN, RNN, Autoencoders
DWH Schemas	Star Schema, Snowflake Schema
VersionControl& Build Tools	Git, GitHub, SVN, CVS, Docker, Kubernetes, Maven, Gradle, Jenkins, Hudson, Bamboo
Reporting Tools	JIRA, Git, VersionOne, Tableau, Power BI
IDEs	PyCharm, IntelliJ, Visual Studio, Eclipse, PL/SQL Developer, Oracle, Spyder, PyScripter, PyStudio, PyDev, IDLE, NetBeans
Databases	Oracle, MySQL, SQL Server, and PostgreSQL, Snowflake, AWS Redshift, Cassandra
Operating Systems	Unix, Windows, Mac, and Linux

EDUCATION:

- Bachelors in Computers Science from VIT Ap – 2022
- Masters in Information Systems Wilmington University - 2024

PROFESSIONAL EXPERIENCE:

Novartis, Texas

Data Engineer | Apr 2023 – Till Date

Responsibilities:

- Assist in building and maintaining scalable data pipelines using AWS (e.g., Glue, S3, Redshift) and GCP (e.g., BigQuery, Dataflow, Cloud Storage)
- Support data ingestion from multiple sources into cloud-based data lakes and warehouses.
- Perform data cleansing, transformation, and validation to ensure quality and consistency.
- Write and optimize SQL queries for reporting and data analysis.
- Monitor data workflows and troubleshoot pipeline failures or performance issues.
- Collaborate with data scientists, analysts, and software engineers to understand data needs.
- Implement basic data security and compliance measures using IAM roles and permissions.
- Use cloud-native tools for data orchestration and scheduling (e.g., AWS Step Functions, Cloud Composer).
- Participate in code reviews and maintain documentation for data processes and systems.
- Help manage metadata and data cataloging using tools like AWS Glue Data Catalog or GCP Data Catalog
- Support migration of on-premise data systems to cloud environments.
- Learn and follow best practices in cloud cost optimization and resource management.

Environment: Python, Scala, Cloudera, AWS, S3, Redshift, EMR, Glue, RDS, SQS, SNS, ETL,, PySpark, Pig, Presto, Sqoop, Flume, Jenkins, Docker, L, MySQL, DynamoDB, GitHub, AWS CloudFormation, Apache Kafka, ELK, JIRA, Power BI, Agile, Scrum.

KMB Software Solutions , Hyderabad, India

Data Analyst | Aug 2021 – Sep 2022

Responsibilities:

- Collecting raw data from various sources such as databases, spreadsheets, and APIs.
- Cleaning and preprocessing data by handling missing values, duplicates, and inconsistencies to ensure accuracy.
- Conducting basic exploratory data analysis (EDA) to identify trends, patterns, and anomalies in datasets.
- Developing and maintaining simple reports that summarize key metrics, findings, and insights.
- Generating clear and understandable visual representations of data using tools like Excel, Tableau, or Power BI.
- Collaborating with different teams to understand data needs and provide insights that support decision-making.
- Presenting data-driven insights to both technical and non-technical stakeholders in a clear and concise manner.
- Ensuring data accuracy, consistency, and integrity by conducting regular checks and updates.
- Assisting in organizing and managing databases, ensuring data is structured for easy access and retrieval.
- Documenting data analysis processes, methodologies, and assumptions for future reference.
- Continuously improving technical and analytical skills by learning new tools, techniques, and best practices.

Environment: Python, SQL, Excel, BI tools, databases, cloud storage, ETL tools, dashboards, scripting, reports, and strong analytical mindset, GIT

VS Tech Worlds Pvt. Ltd., India

Data Analyst Intern | Dec 2020-May 2021

Responsibilities:

- Assisted in collecting, cleaning, and organizing raw data from various internal and external sources.
- Conducted basic data analysis using statistical methods to identify trends and patterns.
- Developed and maintained data visualizations and reports to support business decisions.
- Supported the creation of dashboards using tools like Excel, Tableau, and Power BI.
- Collaborated with team members to identify data needs and provided analytical support.
- Analyzed large datasets to ensure accuracy, consistency, and data integrity.

- Contributed to data-driven insights and presented findings to senior analysts or stakeholders.
- Participated in data validation and quality assurance processes to maintain high standards.
- Documented data analysis workflows, methodologies, and key findings for future reference.
- Gained hands-on experience in using SQL and other data tools for querying and analysis.
- Assisted with ad hoc data projects and helped in automating data collection processes.

Environment: Python, SQL, Excel, BI tools, databases, cloud storage, ETL tools, dashboards, scripting, reports, and strong analytical mindset SQL, Windows, Linux.
