SUMMARY

Data Professional with 5+ years of experience in data analytics, machine learning, and business intelligence. Strong in Python, SQL, statistics, and predictive modeling, with hands-on experience building data pipelines, dashboards, and ML models in cloud environments. Experienced in translating complex data into actionable insights to support data-driven decision-making.

CERTIFICATIONS

- **Microsoft Certified Power BI Data Analyst (PL-300):** Proficient in data modeling, DAX, KPI, and dashboard creation.
- **Microsoft Azure Data Scientist (DP-100):** Skilled in AI/ML models, RAG pipelines, and MLOps on Azure ML.

WORK EXPERIENCE

Target

Brooklyn Park, MN

Data Analyst

Jan 25 – Present

Power BI, Python, SQL, Azure ML, RAG

- Deployed executive Power BI dashboards for merchandising and inventory teams to track product-level sales, stock availability, sell-through metrics for 1000+ SKUs, and replenishment KPIs, improving replenishment speed.
- Conducted product-level performance analysis to identify high-velocity and slow-moving items, contributing to 8–12% improvement in in-stock rates through better assortment and restocking recommendations.
- Designed and maintained end-to-end analytics pipelines (Python, SQL) integrating sales, inventory, and operational data from 5+ source systems, reducing reporting latency by 30% and improving data reliability.
- Developed guest analytics and demand forecasting models in Azure ML, achieving ~90% accuracy and supporting more accurate weekly inventory planning.
- Engineered a Generative AI chatbot using RAG and fine-tuned LLMs on Azure AI Foundry for information retrieval.

Illinois Tollway

Chicago, IL

Data Science Intern

Jan 24 – Dec 24

Tableau, Python, SQL, Pandas, NumPy, Scikit-learn, Data Pipelines

- Designed interactive Tableau dashboards to analyze traffic patterns, operational metrics, and predictive insights.
- Programmed Python & SQL pipelines to clean and unify multi-source datasets and built dynamic dashboards with advanced filtering and querying capabilities, reducing manual work by 10+ hours/week
- Applied ML and statistical models to support forecasting, infrastructure planning, and performance optimization.

Illinois Tech

Chicago, IL

Teaching Assistant and Computer Science Scholar

Aug 23 – Dec 24

R, SQL, Time Series Analysis, Statistical Modeling, Data Visualization

- Taught Python, SQL, data visualization, and statistical analytics to 150+ students.
- Mentored 150+ students in Time Series Analysis, Applied Statistics, and Computer Science using real-world datasets.
- Recognized twice as an outstanding teaching assistant.

Hitachi Vantara

Mumbai, India

Data Analyst

Jun 19 – Jul 23

Python, SQL, Power BI, ETL Pipelines

- Built production ETL pipelines (Python, SQL) consolidating operational, HR, and supply-chain data, which cut data processing time by 30% and enabled timely reporting for stakeholders
- Designed and maintained 10+ Power BI dashboards for departments, enabling real-time, data-driven decisions.
- Identified workforce and process inefficiencies, driving a 25% improvement in operational efficiency.
- Constructed demand forecasting and inventory optimization models, reducing costs by 20%.
- Partnered with cross-functional teams to translate analytics, increasing customer satisfaction & productivity by 15%.

SKILLS

Programming: Python, R, SQL

Analytics & BI: Power BI (PL-300), Tableau, Looker Studio, DAX, Excel

Data Engineering: ETL/ELT, Data Modeling (Star/Snowflake), OLAP, Data Validation

Cloud & Big Data: Azure (ML, ADF, Synapse, AI Foundry), Snowflake, Spark

Databases: MySQL, PostgreSQL, MongoDB

ML & AI: Time Series Forecasting, XGBoost, Scikit-learn, TensorFlow, MLflow, RAG Pipelines

PROJECTS

Costco Spend Analytics Platform Project Link <i>Python, Streamlit, Plotly, ETL, Synthetic Data Generation</i> ● Built a full-stack analytics platform (Python, Streamlit) to analyze purchase history, enabling users to explore spending patterns. ● Designed scalable ETL pipelines parsing 50+ receipt attributes, including synthetic data generation for demos. ● Delivered interactive dashboards with spend trends, inflation analysis, and habit insights.	Dec 2025
Predictive Analytics for Student Retention Project Link <i>Python, Scikit-learn, Time Series Forest, SMOTE, Feature Engineering, Power BI, Statistical Analysis</i> ● Developed ML models with a Time Series Forest meta-model, improving prediction accuracy by 18%. ● Achieved 90.9% recall and 96.3% AUC using SMOTE, feature engineering, and advanced EDA. ● Delivered dashboards and 10+ insights that informed targeted student retention strategies	Aug 2025
Fleet & Logistics Analytics Platform Project Link <i>MySQL, SQL (Stored Procedures, Views, Triggers), Power BI, OLAP Queries, Data Modeling, KPI Reporting</i> ● Designed a normalized MySQL database supporting fleet, driver, and maintenance operations. ● Authored 20+ optimized SQL procedures and views enabling automated reporting and monitoring. ● Built Power BI dashboards tracking 15+ logistics KPIs (fuel efficiency, maintenance costs, trip utilization).	May 2025

EDUCATION

Illinois Institute of Technology Master of Data Science Cumulative GPA: 3.85/4.0 Honors: Outstanding Teaching Assistant (2x) Relevant Coursework: ML, Big Data, Advanced Databases, Applied Statistics, Time Series, Data Analytics	Chicago, IL Dec 2024
