

SRIJA JUTTU | Data Analyst

Location: Pittsburgh, PA | Phone: 412-684-4238 | Email: Srijajuttu@outlook.com

SUMMARY

Skilled as a Data Analyst with over 4+ years of experience delivering data-driven insights across financial services, enterprise analytics, and cloud-based platforms. Experienced in analyzing large-scale structured and semi-structured datasets, building SQL-driven reports, dashboards, and analytical models to support fraud detection, risk analysis, customer behavior insights, and operational decision-making. Proficient in Python, SQL, statistical analysis, and data visualization, with strong expertise in EDA, forecasting, segmentation, A/B testing, and KPI reporting. Demonstrated ability to translate complex data into actionable business insights, collaborate with cross-functional teams, ensure data quality and governance, and deliver analytics solutions aligned with regulatory standards and measurable business impact in Agile environments.

PROFESSIONAL EXPERIENCE

Fidelity Information Services (FIS GLOBAL) | PA, USA

Data Analyst

Mar 2025 – Current

- Performed end-to-end **Data Analysis & Data Analytics** on 10M+ daily **financial transaction** records using **SQL, Advanced SQL (Joins, CTEs, Subqueries, Window Functions)** and **Python (Pandas, NumPy)** to identify spending behavior, fraud patterns, anomalies, and operational risks, improving risk visibility by 30%.
- Built **fraud analytics, predictive analytics, and rule-based risk models** using **statistical analysis, regression analysis, hypothesis testing, and A/B testing**, reducing false-positive alerts by 25% and improving decision accuracy.
- Designed and automated **ETL / ELT pipelines** and **workflow automation scripts** using **AWS (S3, Glue, Lambda)** to support scalable **data warehousing** and analytics-ready datasets for **dashboards & reporting**.
- Conducted **customer analytics, product analytics, cohort analysis, segmentation, and retention analysis** to drive **cross-sell, engagement, and ROI analysis**, increasing digital engagement by 18%.
- Developed **time series analysis, forecasting models, and churn prediction** to support **decision support analytics** for finance and operations teams.
- Created interactive **Tableau dashboards** (Calculated Fields, LODs) and **executive reporting** views translating complex datasets into actionable **KPIs, metrics, and data storytelling** for senior leadership.
- Delivered **ad-hoc reporting, self-service analytics, and KPI tracking & monitoring** solutions for risk, compliance, and business stakeholders.
- Applied **data cleaning, data preparation, data transformation, data validation, reconciliation, and data quality checks** to ensure audit-ready datasets aligned with **data governance and financial compliance standards**.
- Partnered with **product managers, compliance teams, and cross-functional stakeholders** to perform **requirements gathering**, translate business questions into analytics solutions, and present insights to **non-technical stakeholders**.
- Documented **data definitions, metrics logic, testing & validation results**, ensuring transparency, version control awareness, and readiness for regulatory reviews and internal audits.

Hexaware Technologies | India

Data Analyst

Jun 2020 – Apr 2023

- Executed **data analysis and BI reporting** on 200K+ records per engagement using **SQL, Advanced SQL, Excel (Pivot Tables, Lookups)** and **Python**, improving reporting accuracy and data reliability by 25%.
- Designed, developed, and maintained **Power BI dashboards** using **DAX, Power Query**, enabling real-time **KPI dashboards, executive reporting**, and reducing decision latency by 30%.
- Performed **EDA, statistical profiling, trend analysis, root cause analysis, and operational analytics** to support forecasting, performance monitoring, and problem-solving for enterprise clients.
- Built and optimized **complex SQL queries** across **relational databases**, improving query performance and scalability by 25%.
- Supported **ETL validation, data reconciliation, and testing & validation** across source systems, data warehouses, and reporting layers during UAT and production releases.
- Designed **data models (star and snowflake schemas)** to improve **BI performance, dashboard development**, and scalability of reporting platforms.
- Prepared clean, high-quality **feature datasets** for **machine learning / AI models**, improving downstream model stability and predictive accuracy by 20%.
- Worked with **Azure Data Factory, Azure SQL, Blob Storage, Synapse (exposure)** to support **cloud-based analytics workflows** and scalable **data warehousing solutions**.
- Delivered **weekly, monthly, and ad-hoc reports** using **Power BI, Excel, SQL**, supporting leadership decision-making and business insights generation.
- Collaborated in **Agile environments** with business analysts, QA, ETL teams, and clients, demonstrating strong **stakeholder management, communication skills, ownership mindset, and time management**.
- Ensured adherence to **data governance, metadata standards, access controls, and documentation best practices** across reporting systems.

Hexaware Technologies | India

- Data Analyst Intern**

Dec 2019 – May 2020
- Collected, cleaned, and prepared raw data using **data cleaning, transformation, validation, and reconciliation techniques** to ensure accuracy and consistency.
 - Conducted **EDA, statistical analysis, and anomaly detection** to support **business insights, operational analytics, and decision support**.
 - Wrote **SQL queries** to extract, aggregate, and validate data from **relational databases**.
 - Built **interactive dashboards and reports** using **Power BI and Excel** to track **KPIs, metrics, and performance indicators**.
 - Assisted with **ad-hoc analysis, reporting, documentation, and data quality checks**, improving transparency and stakeholder confidence.
 - Collaborated with cross-functional teams, strengthening **analytical thinking, communication, presentation skills, and attention to detail**.

TECHNICAL SKILLS

Data & Analytics: Data Analysis, Business Intelligence, EDA, Forecasting, Trend Analysis, Variance Analysis, KPI Tracking, Data Storytelling, Decision Support

Programming & Querying: Python, SQL, Advanced SQL, R, SAS

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, SciPy, Scikit-learn, Statsmodels, TensorFlow

Visualization & BI Tools: Power BI, DAX, Power Query, Tableau, Looker, LookML, Qlik Sense, Excel, Pivot Tables, VBA

Databases & Warehousing: MySQL, PostgreSQL, SQL Server, Oracle, MongoDB, BigQuery, Snowflake, Redshift

ETL & Data Integration: SSIS, SSRS, Informatica, Talend, Alteryx, ETL, ELT

Cloud Platforms: AWS (S3, Redshift, Lambda), Azure (Data Factory, Synapse), Google Cloud Platform (BigQuery)

Big Data Tools: Spark, PySpark, Databricks, Hadoop, Hive

Machine Learning & Statistics: Regression, Classification, Clustering, Time Series, Hypothesis Testing, A/B Testing

Data Engineering: Data Modeling, Data Wrangling, Data Cleansing, Data Validation, Data Reconciliation

Governance & Quality Data Governance, Data Quality, Metadata, Audit Readiness

DevOps & Collaboration Git, GitHub, GitLab, CI/CD, Jira, Confluence

Methodologies: Agile, Scrum, SDLC

Operating Systems: Windows, Linux, macOS

Soft Skills: Problem Solving, Analytical Thinking, Stakeholder Management, Communication

EDUCATION

Robert Morris University, PA, USA
Masters in Information Science / Studies

Jun 2023 – Dec 2024

Jawaharlal Nehru Technological University, Hyderabad, India
Bachelor of Technology in Computer Science Engineering

Jun 2017 – May 2021

PROJECTS

- Financial Transaction Fraud Detection System**
- Designed and implemented a machine learning–based fraud detection system using Logistic Regression, Random Forest, XGBoost, and Neural Networks on large transactional datasets.
 - Performed data cleaning, feature engineering, class imbalance handling (SMOTE), and model evaluation using precision, recall, F1-score, and ROC- AUC.
 - Achieved 92%+ recall on fraudulent transactions while reducing false positives through hyperparameter tuning and threshold optimization.
 - Visualized risk trends and model outputs using Python (Matplotlib, Seaborn) and presented insights through interactive dashboards.
- Customer Segmentation & Behavioral Analytics using Machine Learning**
- Conducted exploratory data analysis (EDA) and behavioral profiling on customer interaction and transaction datasets to identify spending and engagement patterns.
 - Implemented K-Means, Hierarchical Clustering, and PCA for dimensionality reduction and customer segmentation.
 - Identified distinct customer segments that enabled targeted marketing and personalization strategies, improving simulated campaign effectiveness by 20%.
 - Delivered insights through Power BI dashboards and documented business recommendations for non-technical stakeholders.
