WORK EXPERIENCE

Vishakha Renewables Pvt. Ltd.

Strategy and Planning

Jun 2025 - Present

- Developed and automated **MIS dashboards** and reports for the Business Head, reducing decision-making turnaround time.
- Analyzed plant operations, workforce allocation, and cost drivers to identify inefficiencies, supporting optimization of **~2–3 FTEs**, reduction in power and packing costs, and lowering overall **conversion cost** from **₹14/unit to below ₹10/unit**.
- Coordinated with **Production, Sales, Purchase, and Logistics** teams to improve execution of cross-functional initiatives, reducing inter-departmental delays.
- Performed **import-export data analysis** to track pricing and demand trends, supporting industry and competitor analysis and leadership decision making.
- Worked on various projects, process improvement and automation initiatives, including MES implementation, reporting automation, packaging cost optimization etc.
- Managed and tracked **NFA workflows and MoM action items**, improving approval turnaround time by **~25–30%** through structured follow-ups.
- **Led MES implementation as Project Lead**, enabling real-time production tracking and reducing manual reporting effort.

Data Analyst

Dec 2024 - May 2025

- Delivered **daily production, sales order, and ad-hoc analytical reports** directly to the Business Head and Director, enabling faster decision-making and improving reporting turnaround time by **~20–25%**
- Acted as the **primary coordinator for plant operations (VRPL)**, streamlining communication between Plant and Head Office, improving response time and execution efficiency
- Streamlined **approval management (NFA) and action tracking systems**, reducing approval delays by **~25–30%** and improving cross-functional accountability

Data Analyst Intern

Aug 2024 - Dec 2024

- Applied **statistical analysis and Python (Pandas, NumPy, Scikit-learn)** to solve manufacturing challenges, performing **regression, clustering, and correlation analysis** to identify key factors impacting production quality
- Automated **furnace data collection and processing workflows**, reducing manual data handling effort by **~30–40%** and improving data accuracy for analysis
- Cleaned and transformed large production datasets, enabling reliable input for advanced analytics and improving model effectiveness
- Developed **Power BI dashboards** for line-wise and warehouse production tracking, enhancing real-time visibility into plant performance and supporting data-driven decision-making

Way To Web Pvt. Ltd

Python Data Science Trainee

May 2024 - Aug 2024

- Developed a facial recognition attendance system using Python, OpenCV, and KNN; integrated with MySQL for data management.
- Led training sessions.
- Automated email and WhatsApp messaging for the marketing team to enhance communication efficiency.

EDUCATION

Shanti Business School

P.G.D.M (Data Science) - 8.93

2023 - 2025

- Batch Gold Medalist

Rajdhani Degree College

Bachelor of Science (Hons.) Physics - 7.74

2020 - 2023

- Merit Certificate for outstanding performance in Xth Boards Issued by C.B.S.E - 2017

PROJECTS

Manufacturing Execution System

Feb 2026 - Ongoing

- Spearheaded **MES (Manufacturing Execution System) implementation** as Project Lead, driving end-to-end digital transformation of production monitoring and reporting
- Reduced manual intervention by ~25–30% through automation of data capture and reporting, improving accuracy and real-time visibility
- Led cross-functional coordination with Production, IT, and external vendors to ensure successful system deployment and adoption

Automated Attendance Monitoring System

- Used python to build attendance monitoring system using facial recognition for the company WayToWeb Pvt. Ltd.

Cluster and Regression Analysis

- Conducted cluster and regression analysis using Python to uncover relationships between furnace temperature, luster defects, and other key manufacturing variables at Vishakha, supporting process improvement initiatives.

Power BI Projects

- Developed a line-wise production report for Vishakha Renewables Pvt. Ltd. to monitor daily manufacturing performance.
- Created a warehouse inventory tracking report for Vishakha Glass Pvt. Ltd. to enhance stock visibility and control.
- Daily MIS reporting via Power BI with the Business Head to support timely decision-making.

Yield Improvement Analysis & Cost Optimisation

- Analyzed production data to identify **process inefficiencies and material losses**, enabling data-driven optimization initiatives across manufacturing operations
- Applied **statistical methods and Python-based analysis** for root-cause identification of process variations, improving understanding of key factors impacting yield
- Collaborated with cross-functional plant teams to implement corrective actions, resulting in improved **yield consistency and process stability**
- Contributed to **conversion cost reduction initiatives** by optimizing manpower, reducing packaging costs, and supporting implementation of automation projects

SKILLS

- Programming & Data Analysis: Python (Pandas, NumPy, Scikit-learn, Data Cleaning, File Handling), MySQL (Data Querying), Statistical Analysis, Regression, Clustering
- Data Visualization: Matplotlib, Seaborn, Plotly, Vega-Altair, Bokeh, Power BI, Tableau
- Tools & Platforms: VS Code, Jupyter Notebook, Spyder, Microsoft Power BI, Tableau, Orange, SPSS, MS Excel
- Business & Operations: Production & Sales Analysis, Report Automation, Dashboard Development, Cross-functional Coordination, Communication Management, MoM Follow ups, Inventory Tracking, Import–Export Data Analysis, Process Improvement, KPI Tracking, Manufacturing Data Analytics
- Soft Skills: Stakeholder Communication, Cross-team Collaboration, Problem-solving, Attention to Detail, Analytical Thinking, Decision Support, Adaptability, Documentation & Reporting Accuracy

CERTIFICATE

Certificate of Academic Excellence - For Securing First Position and the gold medal in the class of PGDM - 2025

The Complete SQL Bootcamp: Go from Zero to Hero

Management development program on Business Intelligence Analytics using Power BI
