New Haven, CT | +1 475-549-7266 | samohitha06@gmail.com|[Linkedin](#)

PROFESSIONAL SUMMARY

- Business Data Analyst with 5 years of experience transforming large, complex datasets into actionable business insights across healthcare and financial services.
 - Proficient in data analytics, statistical analysis, and data modeling using SQL, Python, and Power BI/Tableau to drive data-informed decision-making.
 - Experienced in designing, developing, and maintaining scalable data models and ETL pipelines to ensure accurate and timely data delivery.
 - Skilled in synthesizing data trends and insights into clear, impactful reports and presentations for both technical and non-technical audiences.
 - Strong problem-solving mindset with a track record of identifying root causes and recommending effective solutions.
 - Excellent communication skills, adept at collaborating cross-functionally with business stakeholders, engineers, and leadership.
 - Expertise in data governance, quality assurance, and regulatory compliance ensuring data integrity and adherence to standards.
 - Comfortable working in dynamic, fast-paced environments, prioritizing tasks and managing projects efficiently.
-

PROFESSIONAL EXPERIENCE

Optum – Business Data Analyst

Eden Prairie, MN | USA | Dec 2023 – Present

- Analyze healthcare claims, provider, and member data to support operational and clinical initiatives, enabling cost containment and quality improvements.
- Build and optimize SQL queries and Power BI/Tableau dashboards to visualize key metrics, monitor utilization trends, and support strategic decisions.
- Develop statistical models and predictive analytics (e.g., risk stratification, high-cost patient identification) to guide population health programs.
- Design and maintain ETL workflows integrating multiple healthcare data sources to create centralized, reliable analytics platforms.
- Collaborate with finance and clinical teams to identify cost-saving opportunities and optimize care delivery networks.
- Develop, document, and maintain data models, KPIs, and reporting frameworks aligned with business objectives.
- Automate routine reports and dashboards, improving efficiency and report accuracy.
- Perform root cause analyses on data anomalies and utilization shifts, delivering actionable recommendations.

- Communicate insights effectively to stakeholders with varying technical backgrounds, supporting informed decision-making.
- Ensure data quality and compliance with healthcare regulations through rigorous validation and governance processes.

JPMorgan Chase – Business Data Analyst (Remote)

Mar 2021 – Aug 2023

- Conducted detailed analysis of customer, transaction, and product data to support banking initiatives across retail and commercial lines.
 - Designed and built interactive Tableau and Power BI dashboards to track KPIs such as revenue, customer retention, and product usage.
 - Executed complex SQL queries to extract, transform, and aggregate financial data from data warehouses and operational systems.
 - Supported financial forecasting, budgeting, and scenario modeling to guide strategic planning efforts.
 - Developed customer segmentation and predictive models (e.g., churn prediction, credit risk scoring) to support marketing and risk mitigation strategies.
 - Automated recurring management and regulatory reporting processes, enhancing timeliness and reducing manual workload.
 - Collaborated with compliance and risk teams to ensure analytics adhered to regulatory requirements and internal controls.
 - Delivered ad-hoc analysis on transactional anomalies and market trends to explain business performance.
 - Partnered with product managers to assess the impact of new products and pricing strategies through data-driven insights.
 - Improved data quality and integrity by identifying and remediating gaps and inconsistencies.
 - Developed and standardized KPI definitions and metric documentation across multiple business units.
 - Facilitated data governance initiatives and documented analytics processes for audit readiness and transparency.
-

EDUCATION

University of New Haven

Master's in Data Science

Graduated May 2025

SKILLS

- **Data Analytics & Modeling:** SQL (PostgreSQL, MySQL, BigQuery), Python (Pandas, NumPy), Data Modeling Techniques

- **Data Visualization:** Power BI, Tableau, Looker
 - **ETL & Data Integration:** API Integrations, SFTP workflows, automated pipelines
 - **Statistics & Predictive Analytics:** Hypothesis testing, regression analysis, predictive modeling
 - **Reporting & Presentation:** Executive summaries, dashboards, cross-functional communication
 - **Data Governance & Quality:** QA, schema versioning, compliance (HIPAA, financial controls)
 - **Tools & Formats:** Excel (Pivot tables, VLOOKUP, Power Query), CSV, JSON, XML, CRM exports
-

PROJECTS

Care Management Analytics – Optum

- Developed dashboards to track high-risk patient cohorts, care program enrollment, and intervention outcomes to improve health outcomes.
- Built predictive models to identify hospitalization risk, enabling targeted outreach and optimized resource allocation.

Customer Profitability & Churn – JPMorgan Chase

- Conducted multi-channel customer data analysis to measure lifetime value, churn risk, and product profitability.
 - Delivered automated dashboards and propensity scores to help marketing and retention teams prioritize high-impact actions.
-

ACHIEVEMENTS

- Recognized at Optum for delivering analytics that improved cost visibility and resource allocation effectiveness.
- Key contributor at JPMorgan Chase in automating financial dashboards, significantly reducing report turnaround times.
