

Venkata Andala

Supply Chain Analyst

VA, USA | +19136679757 | vijay.andala7@gmail.com | [LinkedIn](#)

SUMMARY

- **Experienced Supply Chain Analyst** with 5+ years in procurement, inventory planning, and logistics across renewable energy, shipping, and technology sectors.
- **Proven track record** in optimizing material flow, reducing stockouts, and improving on-time delivery using SAP S/4HANA, Oracle ERP, and Excel-based planning tools.
- **Skilled in vendor and PO management**, conducting supplier performance assessments, and implementing strategies that improve cost efficiency, lead times, and operational compliance.
- **Strong analytics capability** with Power BI, Tableau, SQL, and forecasting models to monitor KPIs, track OTIF, fill rates, and shortages, enabling actionable supply chain decisions.
- **Operational excellence expertise** in inventory planning, daily SKU tracking, cycle counting, and warehouse coordination to ensure smooth, multi-site project execution.
- **Cross-functional collaborator** experienced in coordinating procurement, logistics, and engineering teams, applying Lean Six Sigma principles to resolve bottlenecks and enhance end-to-end supply chain performance.

SKILLS

Core Supply Chain:	Inventory Planning, PO Tracking, Vendor Management, Lead Time Monitoring, SKU-Level Planning, Shortage Tracking, Demand Forecasting, Material Readiness, MRP, Replenishment Planning, Order Management, Capacity Planning, Inventory Optimization, RCA, Weekly KPI Reporting
Logistics & Operations:	Freight Follow-Ups, WMS (Manhattan/WM) Exposure, TMS Coordination, OTIF / Fill Rate Reporting, Cycle Counting Support, Dock Scheduling Support, Carrier Communication, Transportation Visibility
Tools & Analytics:	Power BI, Tableau, Excel Power Query/Pivot, SQL Reporting, Forecast Models, KPI Dashboards
Cloud & Data Platforms:	AWS (S3, Glue, Redshift, QuickSight, EC2), Snowflake, Google Cloud Platform (BigQuery, Dataflow), Data Lakes & Warehousing
ERP & Systems:	SAP S/4HANA (MM/MM/PP), Oracle ERP, NetSuite, JDA/Blue Yonder, Kinaxis, Coupa
Process & Collaboration:	Lean Six Sigma, Workflow Documentation, Jira, Confluence, SOPs, Standard Work

CERTIFICATIONS

- **Advanced Excel**
- **Data Analysis with Pandas & Python**
- **MySQL for Data Analytics and Business Intelligence**

EXPERIENCE

The AES Corporation	USA
Supply Chain Engineer	Jul 2023 - Present
• Supported procurement for ~\$120M of renewable-energy components by managing PO lifecycle, delivery schedules, GR/IR alignment, and supplier follow-ups in SAP MM, achieving 99% on-time material availability for construction teams. • Tracked KPIs for 25+ suppliers (lead time, OTIF, quality, cost trends) using Tableau scorecards, helping sourcing teams improve vendor selection and drive a 15% reduction in cost deviations. • Built inventory planning models using Excel to optimize safety stock and min-max levels, contributing to an 18% drop in holding costs while preventing installation downtime. • Coordinated multi-state and international freight through logistics partners, performing daily TMS/WMS follow-ups and exception handling to achieve 12% lower transportation cost and improved delivery reliability. • Developed forecasting dashboards aligning procurement timing with phased project rollouts, improving forecast accuracy by 25% and reducing material shortages. • Collaborated with engineering & PMO on shortage tracking, supply risk reviews, and recovery actions, preventing schedule slips worth \$2M in potential delays. • Automated weekly KPI reports (OTIF, open POs, backorders, inventory status) using Excel macros, saving 40 hours per month and improving operational visibility.	

- Conducted supplier & logistics risk assessments (financial, geopolitical, lead-time variability) that reduced disruption exposure by **30%**.
- Performed procurement variance reviews in SAP and identified gaps contributing to **\$3.5M annual savings**.
- Applied Lean Six Sigma principles to improve order-to-delivery workflows, resolving bottlenecks and achieving a **22% improvement in planning throughput**.

Maersk

India

Supply Chain & Operation Analyst

Feb 2019 - Nov 2021

- Worked with 12+ cross-functional teams to document 50+ supply chain requirements and workflows using Jira/Confluence, improving operational clarity for port and inland hub teams.
- Analyzed operations across 8 ports and 12 inland hubs using SAP MM/WM & Excel, identifying process gaps that reduced dwell time **18%** and increased terminal throughput **20%**.
- Improved cargo routing decisions using transportation data, driving a **12% reduction in freight cost** and **15% improvement in on-time delivery**.
- Designed Power BI dashboards covering 20+ vendor KPIs (lead time, OTIF, service reliability), improving vendor performance by **10%**.
- Supported inventory allocation, SKU-level replenishment planning, and terminal flow modeling, reducing idle stock by **14%** and increasing yard throughput **20%**.
- Used operational simulations to analyze yard congestion and truck turnaround times, highlighting changes projected to deliver **multi-million-dollar cost benefits**.
- Automated daily shipment tracking and KPI reporting using Power Automate, saving **30 hours/month** and increasing visibility across hubs.
- Prepared cost-benefit and performance-improvement analyses that supported **\$12M in projected annual savings** for network redesign.
- Led UAT for process rollouts across 3 ports, achieving **95% adherence** to updated operational standards.
- Monitored post-implementation KPIs including cycle time, throughput, inventory accuracy, and fill rate, enabling an **8% improvement** within six months.

HCL Tech

India

Supply Chain Associate

Jan 2018 – Jan 2019

- Documented AS-IS and TO-BE forecasting processes with planning teams to improve demand-supply alignment and reduce planning errors.
- Consolidated ~15M Oracle ERP records into SQL reporting datasets for SKU-level demand-supply visibility and faster decision-making.
- Built forecasting models improving accuracy by **18%**, supporting more stable replenishment and reducing unexpected demand spikes.
- Applied safety stock & reorder point techniques to reduce stockouts by **12%** across 20+ distribution centers.
- Created Power BI dashboards tracking OTIF, fill rate, forecast accuracy, order cycle time, and daily KPIs, reducing manual reporting by **30+ hours/month**.
- Evaluated supplier delivery consistency using Excel PQ/Pivot, driving re-negotiations that achieved **7% sourcing cost savings**.
- Executed UAT cycles for supply chain enhancements, resolved 35+ Jira issues, and delivered reports highlighting improvements in forecast accuracy and inventory performance.

EDUCATION

Masters in Technology-

University of Central Missouri, USA

Bachelors in Mechanical Engineering-

Vignan Institute of Information Technology, India
