

Yogesh Bhardwaj | Data Scientist

USA | +1 (203)-747-6824 | yogesh11bhardwaj@gmail.com | [LinkedIn](#)

SUMMARY

Data Scientist with **3+ years of experience** in data analytics, machine learning, and predictive modeling. Proven expertise in using tools like XGBoost, Scikit-learn, PySpark, Tableau, Power BI, and SQL to analyze large datasets, optimize business processes, and drive data-driven decisions. Demonstrated ability to improve operational efficiency, customer satisfaction, and business performance through data insights and automation. Strong experience in model deployment (AWS SageMaker), predictive analysis, and data pipeline automation, with a focus on healthcare and customer-centric solutions.

SKILLS

- Programming Languages:** Python, R, SQL, Java, Bash
- Data Science & Machine Learning:** Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Time Series Analysis
- Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, TensorFlow, Keras, XGBoost, LightGBM, PyTorch
- Data Engineering & ETL:** Data Wrangling, Data Cleaning, Feature Engineering, ETL pipelines, PySpark
- Data Visualization:** Matplotlib, Seaborn, Plotly, Tableau, Power BI
- Databases & Big Data:** MySQL, PostgreSQL, MongoDB, SQL Server, Snowflake, Apache Hadoop, Spark
- Cloud Platforms:** AWS (S3, EC2, Lambda), Google Cloud (BigQuery), Azure (Data Factory, AzureML)
- Model Deployment & Automation:** Flask, FastAPI, Docker, Kubernetes, AWS SageMaker, CI/CD pipelines
- Model Evaluation & Tuning:** Cross-validation, Hyperparameter Tuning, GridSearchCV, A/B Testing, ROC-AUC, Precision-Recall Curve
- Natural Language Processing (NLP):** Text Classification, Sentiment Analysis, Named Entity Recognition (NER), Tokenization, Lemmatization
- Business Intelligence:** KPI Reporting, Dashboards, Forecasting, Data-driven Decision Making

PROFESSIONAL EXPERIENCE

Data Scientist | Cigna Health | USA Jan 2025 – Present

- Built predictive models using XGBoost and Scikit-learn, which identified high-risk customers early and improved retention by 12%, supporting key business goals.
- Led data cleaning and transformation efforts on large healthcare datasets using PySpark, cutting processing time by 25% and accelerating analysis for faster insights.
- Fine-tuned machine learning models with GridSearchCV and cross-validation, boosting accuracy by 15% on critical performance metrics, directly enhancing forecasting reliability.
- Developed and maintained interactive Tableau dashboards, providing real-time insights into key metrics that empowered stakeholders to make quicker, data-driven decisions.
- Deployed machine learning models on AWS SageMaker, streamlining deployment workflows and increasing data-driven decision-making efficiency across teams by 20%.

Data Analyst | Hyperlink Infosystem | India Aug 2022 – Dec 2023

- Created dynamic Power BI visualizations, enabling management to identify key trends more quickly and improving decision-making efficiency by 20%.
- Cleaned and processed large datasets using Pandas and SQL, streamlining analysis workflows and reducing errors in final reports by 15%.
- Conducted exploratory analysis with R, revealing actionable insights from customer data, which led to an 8% improvement in overall customer satisfaction.
- Developed time series forecasting models in Python, optimizing resource planning and contributing to an 8% reduction in operational costs across departments.
- Integrated data from MySQL and PostgreSQL, speeding up report generation and reducing manual data handling efforts by 30%.
- Automated data pipelines and reporting tasks, freeing up 25% of team time for higher-level analytical work, improving productivity and output quality.

Data Analyst | iView Labs | India Sep 2021 – Jul 2022

- Automated data cleaning tasks with Python and SQL, saving the team 12 hours per week and ensuring higher data accuracy in reporting processes.
- Collaborated with cross-functional teams to design data solutions, improving data accessibility, which boosted team efficiency and workflow by 10%.
- Built Power BI dashboards to track business metrics, providing leadership with real-time insights that improved decision-making speed and accuracy.
- Implemented automated data validation checks, reducing reporting errors by 20%, which enhanced data integrity and ensured reliability in monthly reporting.
- Developed anomaly detection models in Scikit-learn, reducing system failures and operational risks by 15%, leading to smoother operations and fewer disruptions.

EDUCATION

Master’s Degree in Data Science Sacred Heart University, Fairfield, CT	May 2025
Bachelor’s Degree in Computer Science and Engineering Chandigarh University, India	July 2023
